

iVotePK: COMPLETE USER GUIDE MANUAL FOR PAKISTAN'S INTELLIGENT DIGITAL VOTING SYSTEM

iVotePK © 2026 | Secure. Accessible. Transparent.

FULLY DIGITALIZED

Intelligent Digital Voting System

1. Overview

iVotePK is a secure, intelligent, and fraud-resistant online voting platform designed to ensure **transparent and fair elections** through advanced technologies such as:

- Multi-factor authentication
- Biometric verification (Face & Fingerprint)
- AI-powered fraud detection
- Real-time vote monitoring

This manual provides a **step-by-step guide** for users to successfully register, verify identity, and cast votes securely.

2. Purpose of This Guide

This guide is designed to help users:

- Understand how the system works
- Complete secure registration
- Perform biometric authentication
- Participate in elections
- Troubleshoot common issues

3. System Requirements

To ensure smooth operation, users must meet the following requirements:

Hardware Requirements

- Desktop / Laptop / Smartphone
- Webcam (mandatory for face recognition)

Fingerprint-supported device (Windows Hello / Mobile biometric)

Software Requirements:

Modern browser (Google Chrome recommended)

JavaScript enabled

Stable internet connection

4. Account Registration Process

Creating an account is the first step to access the system.

Step 1: Access Registration Page

Navigate to the iVotePK website

Click on **“Register”**

Step 2: Enter Personal Information

Provide accurate details:

Full Name

CNIC (13-digit unique number)

Email Address

Phone Number

Password

☐ Ensure CNIC and email are valid and unique.

Step 3: Email Verification (OTP)

A One-Time Password (OTP) will be sent to your email

Enter OTP in the verification field

This confirms your identity and activates your account

Step 4: Security Questions Setup

Select **3 security questions**

Provide answers (case-sensitive recommended)

These are used for:

- Account recovery

- Additional authentication

5. Biometric Registration (Mandatory)

Biometric setup is **required to proceed**.

5.1 Face Recognition Registration

Process:

- Allow camera access

- Capture face from multiple angles:

 - Front

 - Left

 - Right

- System processes facial features

Important Notes:

- Ensure good lighting

- Avoid face obstruction (glasses, masks)

- Stay steady during capture

Security:

- No raw images stored

- Only encrypted facial data is saved

5.2 Fingerprint Registration

Process:

- System will trigger device biometric prompt

- Use:

Fingerprint sensor

Windows Hello / Mobile biometrics

Complete verification

Security:

No fingerprint images stored

Cryptographic keys used for authentication

6. Login Process

To access your account:

Step 1: Enter Credentials

Email

Password

Imp : **Forgot Password Procedure**

If you forget your password, you can use the ‘Forgot Password’ option. An OTP will be sent to your email. Enter the OTP and answer one security question to reset your password

Step 2: Biometric Authentication

Choose one:

Face recognition

Fingerprint verification

Step 3: Additional Verification (if required)

Answer security question

Step 4: Access Dashboard

After successful verification, you will be redirected to the **User Dashboard**

?? 7. User Dashboard Overview

The dashboard is your control panel.

Key Sections:

<i>Feature</i>	<i>Description</i>
<i>Active Elections</i>	View ongoing elections
<i>Meet Candidates</i>	Candidate details
<i>Cast Vote</i>	Voting interface
<i>Vote History</i>	Previously cast votes
<i>Profile</i>	Personal information
<i>Chatbot</i>	Instant help system

8. Voting Process (Step-by-Step)

Step 1: View Ongoing Elections

Click **“Ongoing Elections”**

Step 2: Select Election

Choose election type:

National

Provincial

Local

Step 3: Review Candidates

Click **“Meet Candidates”**

Review:

Candidate name

Party

Symbol

Step 4: Cast Vote:

Click “**Vote**” for your chosen candidate

Step 5: Multi-Layer Verification

System verifies:

Security question

Fingerprint authentication

Face recognition

Step 6: Vote Submission

Vote is securely stored

AI fraud detection runs automatically

Vote is counted in real-time

Step 7: Vote Confirmation

A success message is displayed

A **digital receipt** is generated

9. Digital Vote Receipt

Each vote generates a unique receipt:

Contains:

Receipt number

Election details

Timestamp

Purpose:

Verify vote submission

Maintain transparency

10. Real-Time Results

Users can view

- Live vote count

- Party-wise results

- Leading candidates

Data updates instantly via real-time system

11. AI Chatbot Assistance

The system includes a smart chatbot.

Features:

- Answers user queries

- Guides through processes

- Provides instant help

Supported Queries:

- Registration help

- Voting steps

- Login issues

- Biometric setup

12. Security & Privacy Features

iVotePK ensures maximum security:

Authentication Security

- Multi-factor authentication

- JWT-based secure session

Data Protection

- Encrypted storage

- Secure communication (HTTPS)

Voting Integrity

- One person = One vote

- Duplicate prevention

Fraud Detection

- AI-based monitoring

Suspicious activity detection

13. Rules & Guidelines

Users must follow:

- Vote only once per election
- Do not share credentials
- Complete biometric setup
- Use personal device when possible

! 14. Troubleshooting Guide

Issue: Camera Not Working

- Allow browser permissions
- Restart browser
- Check device connection

Issue: Fingerprint Not Detected

- Use supported device
- Clean fingerprint sensor
- Retry verification

Issue: OTP Not Received

- Check spam/junk folder
- Wait 30–60 seconds
- Request resend

Issue: Login Failed

Verify credentials

Reset password

15. Account Recovery

If you forget your password:

Steps:

Click **“Forgot Password”**

Enter email

Verify OTP

Answer security questions

Set new password

16. Support & Assistance

If issues persist:

Use chatbot

Contact system administrator

17. Best Practices

Use a secure device

Maintain stable internet

Complete verification carefully

Review candidates before voting

18. Conclusion

iVotePK provides:

Secure authentication

Transparent elections

Real-time monitoring

Fraud prevention

Your vote is:

✓ Secure

✓ Private

✓ Counted
